

SPEED MINI HAND CHAIN HOIST

World's Smallest Industrial Hoist

With its smooth lines, integrated aluminum body, impossibly small size and 360 degree rotation chain guide, the **SPEED-MINI-360°** is a remarkable engineering achievement in both design and performance making it the ideal tool for use in high or difficult to reach places.

360 Degree Rotation Chain Guide

The 360-degree design is ideal for multi-angle applications, allowing the operator to easily lift from almost any position. The 360° rotation chain guide housing ensures a high degree of safety as it is possible to work outside the dangerous area.

250KG, 500KG, 1000KG, 1500KG, 2000KG to 30Ton are available.

Completely Sealed Gears and Brake

Completely sealed brake and gearing give you added protection against damage from dust and water which makes maintenance simple and keeps your hoist performing longer.

Tough, Lightweight Aluminum Housing

The **SPEED-MINI-360°** gives you a unique combination of portability and extreme durability with its lightweight, die-cast aluminum housing. Take this little hoist with you everywhere for the small jobs that require big dependability.

Daily application

The **SPEED-MINI-360°** is the most versatile mini chain hoist on the market and the preferred standard addition to your toolbox for everyday applications.

The **SPEED-MINI-360°** is ideal for virtually any low volume lift and is ideal for use in the home, factory, field construction, agriculture, warehouse and small equipment installations. Anti-corrosion properties ensure durability in chemical food and marine environments.

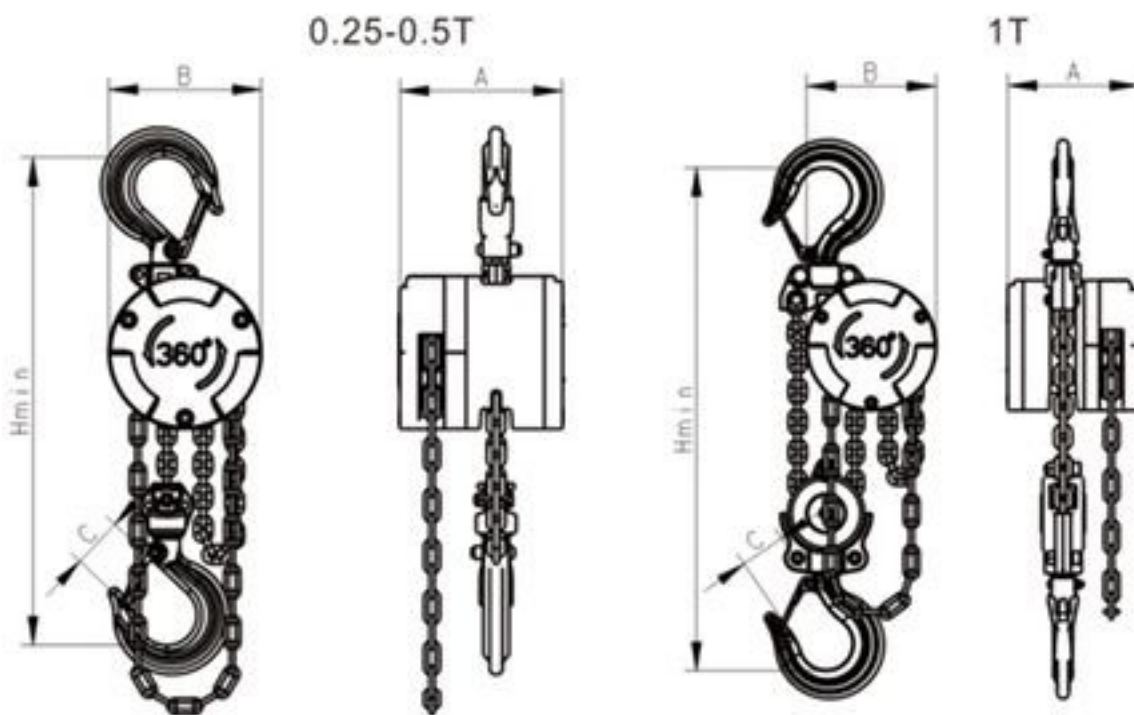

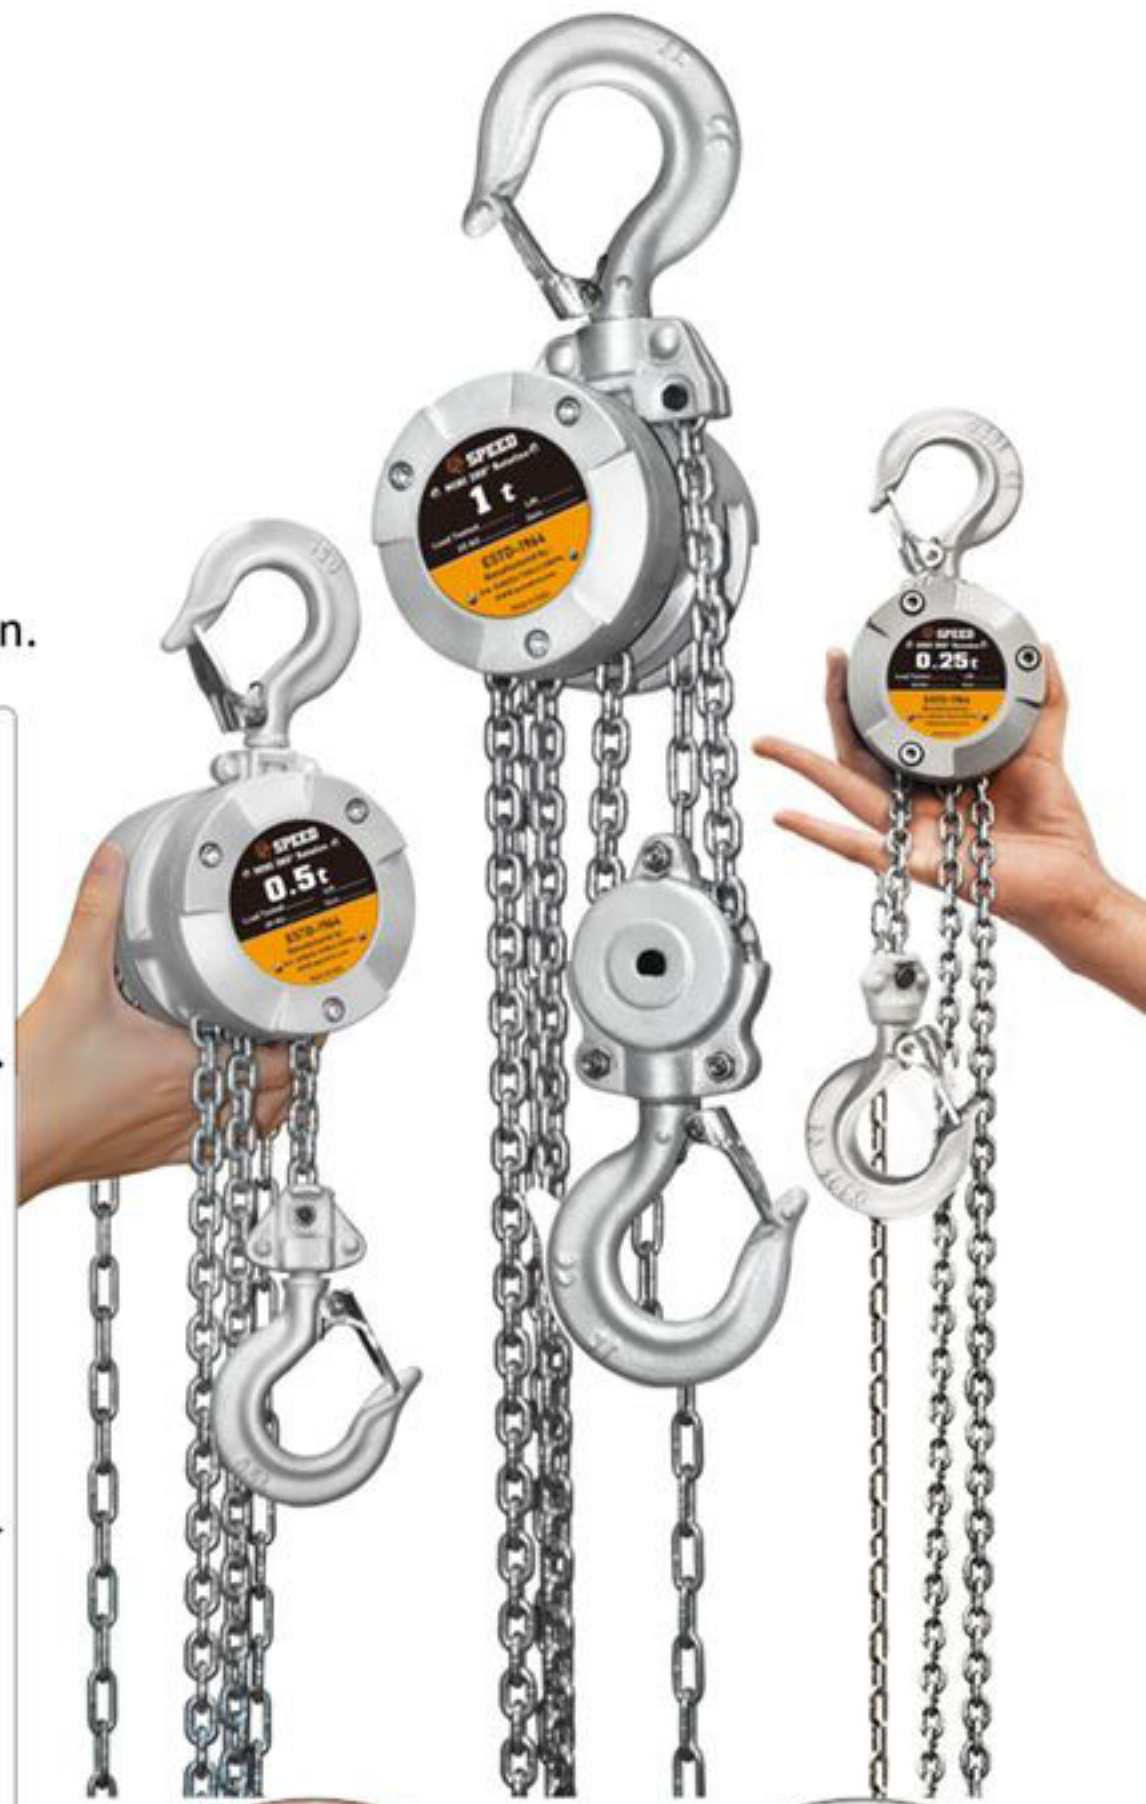

SPEED MINI HAND CHAIN HOIST

INTRODUCTION

The product design of the hand chain hoist greatly surpasses the traditional hand chain hoist products in terms of operating space and user safety protection.

FEATURES

- Small, low headroom.
- Made of aluminium, light, portable, corrosion resistant, robust.
- Freight cost saving, 0.25T model weight is only 2.2kg.
- One-Piece integrated Aluminium body structure, low maintenance, long service life.
- Fully enclosed design, completely sealed gears and brake.
- Fully enclosed design with galvanised chains, this model can be used in medical or food workshops which have high standards for the environment.
- The inner diameter of the hook is increased for wider applications.
- The cover bolts are smooth hand feeling.
- Patented 360° rotation hand chain guide, the user can operate from any angles, standing away from heavy objects.

- Constructed of canvas material for durability.
- Convenient belt loop for easy tool belt attachment.
- Velcro flap for quick access.
- Lightweight for user comfort.
- Portable bag is optional for 0.25T & 0.5T model.

SPECIFICATIONS

Model	Capacity (T)	Hand Force (N)	Lifting Height (m)	No.of falls of load chain	Specifica-tion of load chain (mm)	Running Test(KN)	Dimensions(mm)				Net weight (kg)
